Firmware Upgrade on Linux

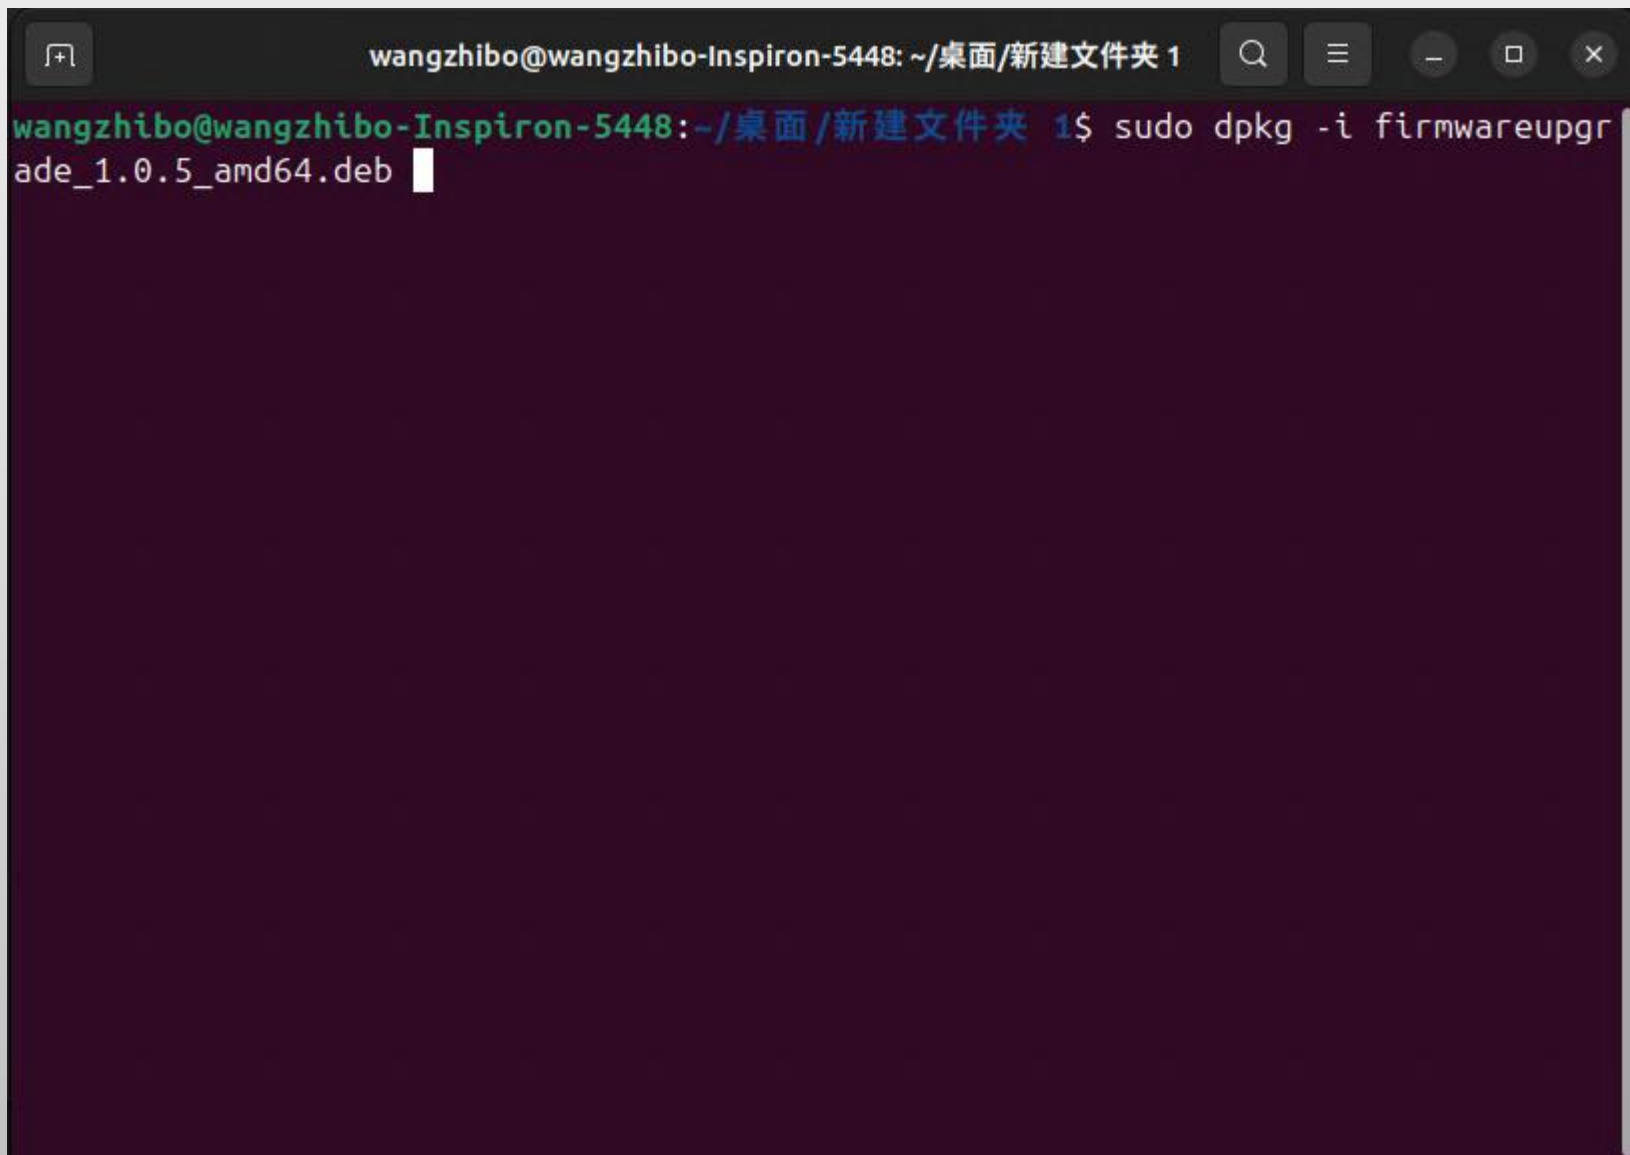

Operation Tips

1. Install firmware upgrade software. Right-click and open Command Manager.

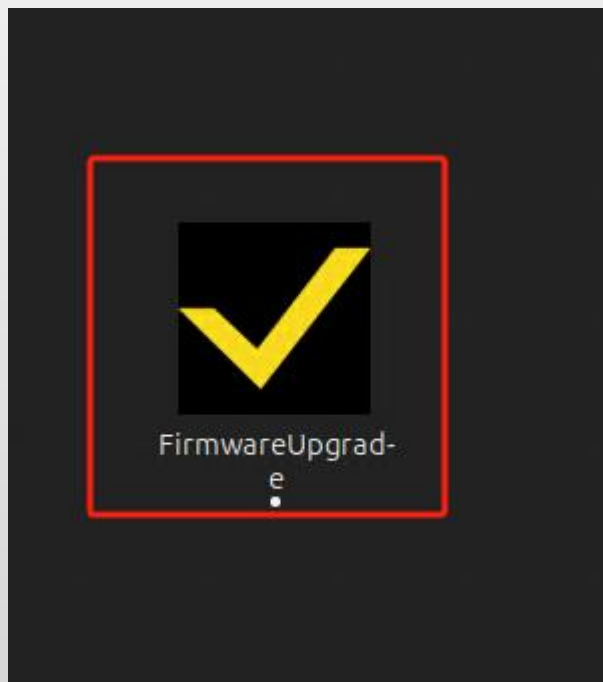

2. Enter command: `sudo dpkg -i firmwareupgrade_1.0.5_amd64.deb`

A terminal window with a dark background and light-colored text. The window title bar shows the user 'wangzhibo' and the host 'wangzhibo-Inspiron-5448', along with the current directory '~/桌面/新建文件夹 1'. The terminal content shows the command 'sudo dpkg -i firmwareupgrade_1.0.5_amd64.deb' being entered at the prompt. The prompt is 'wangzhibo@wangzhibo-Inspiron-5448:~/桌面/新建文件夹 1\$'.

```
wangzhibo@wangzhibo-Inspiron-5448: ~/桌面/新建文件夹 1
wangzhibo@wangzhibo-Inspiron-5448:~/桌面/新建文件夹 1$ sudo dpkg -i firmwareupgr
ade_1.0.5_amd64.deb
```

3. After install sucessfully, the Firmware Upgrade software will display like picture below on your PC.

4. Upgrade the radio firmware.

- ① Put the radio into DFU mode following the instructions.
- ② Connect the radio to the PC.
- ③ Choose the correct com port.
- ④ Select the firmware file.
- ⑤ Download the file to the radio.
- ⑥ The radio will auto-restart after the firmware upgrade 100%.
